The year of the LIC

2017 was another big year for both Listed Investment Companies (LIC) and Listed Investment Trust (LIT) with a record number of new and innovative entrants into the sector. LIC/LIT dominated capital raisings, collectively bringing \$3.7bn via Initial Public Offerings (IPO). And this was further supported by a number of secondary market raisings that saw \$1.2bn raised during the course of 2017. In this piece, we recap the factors behind the LIC boom over the last couple of years. Plus, we elaborate on 2 major structural changes in the sector which we view as positive development for future LIC IPOs.

(continued page 3).

Investment Key Picks

As at the end of the Quarter, our key picks across pre-tax NTA and share price performance, distribution yield (based on the previous 12 months and including Special Dividends) and valuation were as follows. Please note that historical performance is no guarantee of future performance.

Table 1: Quarter Highlights

Pre-Tax NTA Performance (p.a.)

31-Dec-17	Large	Lrg/Medium	Med/Small	Alternative	Intl
(%)	AFI	DUI	ACQ	CDM	MFF

It is important that clients are aware that the share price of a LIC is impacted by the oscillation of the discount or premium to NTA, which should be taken into consideration when investing in LICs. We therefore advise clients to view this report in conjunction with the Bell Potter Weekly Indicative NTA. For further information please speak to your Bell Potter Adviser.

Market Update

The year of the LIC

2017 was another big year for both Listed Investment Companies (LIC) and Listed Investment Trust (LIT) with a record number of new and innovative entrants into the sector. LICs/LITs dominated capital raisings, bringing in \$3.7bn via Initial Public Offering (IPO) - accounting for more than half of the IPOs raisings for the year. And this was further supported by a number of secondary market raisings that saw \$1.2bn raised.

The growth rate of LICs has been higher than that of managed funds. And we can associate this to 3 tangible reasons:-

- **Future of Financial Advice (FoFA) reforms:** As of July 2013, commissions paid to financial planners by providers of managed fund have been banned. This has removed the incentive for financial planners to use managed funds over LICs or Exchange Traded Funds (ETFs).
- **A competitive dividend yield in comparison to the ASX200:** In July 2010, there was a significant change in the Corporations Act that paved the way for LICs to offer greater consistency in dividends. Previously, LICs could only pay a dividend if they had an accounting profit, which saw a number of LICs being unable to pay dividends through the GFC. However, following the introduction of the solvency test, LICs now have greater flexibility to offer sustainable dividend policies even with the absence of accounting profit. Many LICs offer a grossed up yield higher than the Australian share market grossed up yield of 6.0%.
- **Stronger demand from the growing Self Managed Super Fund (SMSF) market:** An increasing number of investors are looking for greater control over their superannuation. The combination of rising property prices and prolonged low interest rate environment has resulted in a level playing field for alternative investment vehicles such as LICs and ETFs. SMSFs are a valuable investor base to cater for, as they now account for 28% of all superannuation assets in Australia and are growing.

We also saw two structural changes which we view as positive developments for the sector in 2017. These changes were:-

- **IPO Cost Absorption:** Historically, the cost of a LIC IPO - generally a fee of 2-3%- was transferred to the shareholder at listing. As a result, for example, a \$1.10 IPO will see an opening NTA of \$1.06-\$1.09. In late 2017, we saw a shift where LICs came to market with a proforma Net Tangible Assets (NTA) in line with its issue price. Managers of Magellan Global Trust (ASX:MGG), Spheria Emerging Companies (ASX:SEC) and VGI Partners Global Investments (ASX:VG1) absorbed the issue cost associated with its IPO, while MCP Master Income Trust (ASX:MXT) had its issue cost paid via a loan, which will be amortised by shareholders over the next 10 years. This enabled shareholders of MGG, MXT and VG1 to access these LICs at NTA on day one.
- **No more bonus options:** Bonus options issued at IPOs have generally been offered to investors to compensate for the issue cost reflected in the NTA. Investors who seek to purchase these securities in the secondary market, must be cautious of the potential dilutionary impact on the NTA of in-the-money options, as options expiry nears. What is perhaps less understood is that the person who exercise these options is not diluted as they have received the benefit of a lower exercise price. As a result, bonus options can be sometimes view negatively by shareholders. With Managers choosing to absorb the vast majority of the IPO cost, LICs no longer have to offer options as an IPO sweetener. As a consequence, a number of LICs came to market without an option attached, removing the overhang that is cast around LICs close to option expiry.

We anticipate this will likely drive further interest and larger capital raisings that are likely to tip through \$500m plus.

Table 2: LIC/LIT IPO's - 2017

Name (ASX)	Listed	Issue Price	Proforma NAV	Option Ratio Bonus	IPO Raising
Fat Prophets Global Contrarian Fund (FPC)	Mar-17	\$1.10	\$1.08	1 option for 1 share	\$48,532,405

Market Update

Initial Public Offerings

2017 was the best year for IPOs in the LIC sector since 2015, buoyant with positive market conditions. There were 13 new vehicles launched (including Listed Investment Trusts) raising over \$3.0bn, the largest of which was the Magellan Global Trust (ASX:MGG), which raised \$1.5bn in October.

Graph 1: Money raised from LIC/LIT IPOs - 2003 to 2017

SOURCE: COMPANY DATA, IRESS & BELL POTTER

Table 3: Of the top 10 IPOs for 2017, 6 are LIC/LIT

Name (ASX)	Offer Size
Magellan Global Trust (MGG)	\$1515.6m
VGI Partners Global Investments (VG1)	\$550.0m
MCP Master Income Trust (MXT)	\$516.2m
Bingo Industries (BIN)	\$439.6m
Plato Income Maximiser (PL8)	\$325.9m
Netwealth Group (NWL)	\$264.2m
Wagners Holdings Co (WGN)	\$196.8m
WAM Microcap (WMI)	\$154.0m
Convenience Retail REIT (CCR)	\$133.2m
Spheria Emerging Company (SEC)	\$132.7m

SOURCE: BLOOMBERG

Of the new products, 6 were new International LICs — Fat Prophets Global Contrarian Fund (ASX: FPC), Fat Prophets Global Property Fund (ASX:FPP), Morpheic Ethical Equities Fund (ASX:MEC), Contango Global Growth (ASX:CQG), VGI Partners Global Investments (ASX:VG1), Magellan Global Trust (ASX:MGG). We are still seeing huge demand for international products from Managers with a proven track record coupled with effective communication.

Investors search for yield has put LICs in the front and centre as Plato Income Maximiser (ASX:PL8), MCP Master Income Trust (ASX: MXP) and Magellan Global Trust (ASX:MGG) have promoted their products with the goal of providing investors with a strong yield. MXP was also the first and only LIT to offer corporate debt exposure on the ASX.

Capital Raising

A total of \$566m was raised in the secondary market through a range of Dividend Reinvestment Plans (DRP), Entitlement Offers, Placement Offers and Share Purchase Plans (SPP).

Market Update

WAM Capital (ASX:WAM) was the largest player raising \$56.1m via a DRP. Given WAM traded at a large premium for the majority of 2017, many investors took advantage of the DRP process to increase their holdings. Global LIC Platinum Capital (ASX:PMC) is still one of the top global managers amongst investors as PMC raised \$70.1m through its Share Purchase Plan and Placement offers in 2017.

Market Update

Options

Options have historically been a popular avenue for LICs to raise capital. A total of \$631.8m was obtained through the exercise of options in 2017. WAM Leaders (ASX:WLE) lead this section raising \$375.9m before its options expired in November. We believe WLE saw majority of its options exercise, with a huge chunk of it being exercised in the 4Q17, because of two reasons. The first being, WLE options were in the money majority of the year. Secondly, investors tried to take advantage of WLE's November dividend payment. Unfortunately, Argo Global Listed Infrastructure (ASX:ALI) and Monash Absolute Investment Company (ASX:MA1) saw most of their options expire out of the money.

Table 6: CY17 Options Exercised

Market Update

Options

As noted earlier, we suspect many LICs will not issue more options going forward. Despite this a large number of options remain outstanding in the LIC space. There is ~\$659.0m in options capital that could be exercised over 2018. However, only Ellerston Global Investment (ASX:EGI), Antipodes Global Investment Company (ASX:APL) and Ryder Capital (ASX:RYD) are trading above the exercise price, suggesting only a fraction of these options will be exercised within this period.

Table 8: Outstanding Options

Investment Performance

In the Table below, we have evaluated our LICs using the performance of both the pre-tax NTA and share price. The pre-tax NTA data seeks to measure the performance of the underlying investments of the Fund. Whereas, the share price data measures the performance of the security as it trades on the ASX. However, some of this terminology is a little misleading as the pre-tax NTA actually reflects tax associated with realised capital gains (tax applicable on positions that have been exited) but not unrealised capital gains (tax applicable on positions that have not been exited).

Table 10: Pre-tax NTA and Share Price Performance

			Pre-tax NTA										Share price

CDM: In May 2011 CDM received \$0.22 per CDM share of franking credits when RHG returned the majority of its assets in the form of a fully franked dividend. At the time, CDM shares were trading at \$1.25. These franking credits were worth 17.6% of the CDM share price at the time and are not reflected in our performance calculations as the calculations are based on pre-tax NTA and not post-tax NTA.

Investment Performance (continued)

The measurement of a LIC’s performance is calculated after all operating expenses, provision and payment of both income and realised capital gains tax and the reinvestment of dividends, but does not incorporate franking. LIC returns will consequently be understated relative to the Index return given that the Benchmarks do not factor in operating costs or taxation. The performance of Unlisted Unit Trusts are not measured on an after tax basis and are therefore, generally, not a valid comparison.

In order to assess a LIC’s performance, NTA and share price need to be evaluated with respect to the relative mandate and/or benchmark, given varying outcomes from different styles of investment. Hence, for the Domestic LICs we have categorised the LIC’s Mandate into those with a Large, Large to Medium, Medium to Small, and Small Market Capitalisation investment focus, Long/Short/Market Neutral, International, and Specialist investment focuses following an analysis of the LIC’s Top Stock Holdings.

In general, the NTA has been benchmarked against the relative indices preferred by the Manager and these should be most reflective of its mandate. The share price of each LIC, apart from International and Specialist LICs, has been benchmarked against the All Ordinaries Accumulation Index, given this is the broadest index on the ASX and the exchange in which each LIC trades. This is arguably a less relevant benchmark.

Our value-add columns seek to quantify the value generated by the Manager. It is the difference between the performance of the share price and pre-tax NTA against the relevant benchmark. A positive value indicates outperformance against the Benchmark and a negative value indicates an underperformance. We view the pre-tax NTA value-add as the most relevant measure of management performance.

Historical Gross Dividend Yield

Dividends are an important aspect of any investment decision. In the Graph below, we have included historical Net Dividend Yield and Gross Dividend Yield for the LICs in our universe. Nonetheless, investors must realise that although historical yield is clearly a key consideration when selecting a LIC, it is no guarantee of future yield. Please note several LICs have recently entered the market and have not paid a dividend yet.

Graph 2: Historical Dividend Yield (Net and Gross)

SOURCE: COMPANY DATA, IRESS & BELL POTTER

Premium/Discount to NTA

We have categorised our universe of LICs according to the percentage premium or discount the share price trades at relative to the pre-tax NTA.

SOURCE: COMPANY DATA, IRESS & BELL POTTER

LICs often trade at a consistent premium or discount to NTA, with the standard deviation providing a measure of the range in which a LIC's premium/discount normally falls. By determining each LIC's average premium/discount we can look for anomalies between average premiums/discounts to NTA and current premiums/discounts to NTA. We have calculated each LIC's 5-year average (please note a number of LICs have a history less than 5 years and therefore not included in the graph) share price premium/discount to reported pre-tax NTA as well as its standard deviation from that average, which we portray in the below graph. Here, we are trying to convey whether or not a LIC is cheap or expensive compared to its historical average.

Graph 3: Share Price Premium/Discount to Pre-Tax NTA Relative to 5-year Average

SOURCE: COMPANY DATA, IRESS & BELL POTTER

The average share price discount to pre-tax NTA for this quarter is 0.2x (Standard Deviation). In the Large Market Capitalisation investment focus, **AUI** looked the most reasonably valued. Medium to Small are trading at a substantial premiums, with the exception of **CIN** and **CAM**. International focused LICs are also looking expensive as more investors try to diversify their portfolio with global assets.

Premium/Discount to NTA (continued)

In Graph 4 we have provided some context to the share price premium or discount to pre-tax NTA. Pre-tax NTA reflects realised capital gains (tax applicable on positions that have been exited) but not unrealised capital gains (tax applicable on positions that have not been exited).

Graph 4: Share Price Premium/Discount versus Pre-Tax NTA

SOURCE: COMPANY DATA, IRESS & BELL POTTER

Graph 5 shows the share price premium/discount against post-tax NTA. Post-tax NTA reflects realised (tax applicable on positions that have been exited) and unrealised capital gains (tax applicable on positions that have not been exited). While this measure is arguably less relevant, it does provide additional comparison, particularly when viewed with Graph 4. Post-tax NTA is most useful in a wind-up scenario.

Graph 5: Share Price Premium/Discount versus Post-Tax NTA

SOURCE: COMPANY DATA, IRESS & BELL POTTER

Premium/Discount to NTA (continued)

Graphs 6 & 7 show the pre-tax NTA performance of each LIC, assuming dividends are reinvested, over the past 3 and 5 years. This is reflected by its position along the horizontal axis, with LICs further to the right having achieved higher returns. The Graphs also highlight the share price premium or discount to pre-tax NTA at which each LIC was trading at Quarter End. This is reflected by each LIC's position along the vertical axis.

Graphs 6 & 7: Share Price Premium/Discount vs Pre-Tax NTA Performance

Pre-tax NTA performance is one way of reflecting the performance of a LIC's management and the standard deviation of the pre-tax NTA performance can be used as a measure of risk by reflecting the movement or dispersion from the average return. The below graphs can therefore give an indication of a LIC's risk-return over the time periods.

Graphs 8 & 9: Pre-Tax NTA Performance Standard Deviation vs Pre-Tax NTA Performance

Premium/Discount to NTA (continued)

LICs by their very nature can trade at either a premium or discount to pre-tax NTA. However, from a quantitative perspective, we have noted a tendency for LICs to revert to their mean premium or discount through the Cycle. As such, investors need to be cognisant of how a LIC trades through the Economic Cycle to ensure an investment is timed appropriately.

As noted in our quarterly in September 2015, Large LICs (Market Cap > \$500m) appear to behave differently from Small LICs (Market Cap < \$500m) through the Economic Cycle. Large LICs tend to trade at a substantial premium to pre-tax NTA in perceivably difficult or uneasy market conditions and a lower premium to pre-tax NTA in perceivably improving market conditions. One could argue that during uneasy market conditions investors prefer the safety of Large LICs with an established track record and hence push them up into substantial premiums. Whereas, in more favourable market conditions, investors have a tendency to view large LICs as a lower return investment alternative and instead favour smaller and more exotic LICs, hence driving large LICs' premiums lower.

Graph 10: Large Cap Focused LICs' Average Share Price Premium/Discount to Pre-tax NTA

SOURCE: COMPANY DATA, IRESS & BELL POTTER

However, it is interesting to note, that we are currently in a period where Large LICs are deviating from its norm. Since early 2013, we see Large LICs trading at a premium to pre-tax NTA - even in a rising market. This phenomenon exist due to an increase of demand for Large LICs. We associate this greater demand to two underlying factors.

- **Future of Financial Advice (FoFA) reforms.** Since July 2013, commissions paid to financial planners by providers of managed fund have been banned going forward. This has removed the incentive for financial planners to use Managed Funds over LICs or ETFs.
- **A competitive dividend yield in comparison to the ASX200.** In July 2010, there was a significant change in the Corporation Act that have paved the way for LICs to offer greater consistency in dividends. Previously, companies could only pay a dividend if they had an accounting profit, which saw a number of LICs being unable to pay dividends through the GFC. However, following the introduction of the solvency test, LICs now have greater flexibility to offer sustainable dividend policies even with the absence of an accounting profit.

Premium/Discount to NTA (continued)

Small LICs tend to operate in almost an opposing fashion. In general, Small LICs trade at a larger discount to pre-tax NTA, averaging an 8.4% discount over the last 8 years, which compares to the Large LICs 3.5% premium over the same period. Broadly speaking, as market confidence rises, Small LICs tend to trade at a smaller discount as investors' confidence rises. However, as market conditions turn, these small discounts tend to turn into deep discounts.

Graph 11: Small Cap Focused LICs' Average Share Price Premium/Discount to Pre-tax NTA

SOURCE: COMPANY DATA, IRESS & BELL POTTER

The graph below shows International LICs' discounts have historically been pretty much correlated with the global markets. These LICs traded at varying deep discounts when first introduced, for a combination of both the GFC made investors reluctant to hold international assets and international vehicles were originally not viewed as the yield making machines as domestic stocks. However as global share markets rose, so did the demand for these LICs—narrowing these discounts. While, as confidence falls within the global markets, we tend to see these discounts expand.

Graph 12: International Cap Focused LICs' Average Share Price Premium/Discount to Pre-tax NTA

SOURCE: COMPANY DATA, IRESS & BELL POTTER

LIC Indicative NTA

LICs are only obligated to disclose their NTA at the end of each month and have 14 days to disclose this information to the Market. This means that an investor is only able to retrospectively gauge the value of the underlying NTA and for the remainder of the month be ignorant to the underlying value of the NTA.

Bell Potter has sought to address this gap by providing an Indicative Live NTA. We calculate the Indicative NTA by tracking the underlying NTA each week. This is achieved by monitoring the percentage movements of the Disclosed Holdings and using an appropriate proxy to track the movement of the remaining positions. We also adjust the NTA when the security goes ex-dividend.

The Indicative NTA works best with LICs that have a high percentage of investments concentrated in its Top 20 Holdings, regular disclosure of its holdings and cash position, lower turnover of its investments, and the absence of a performance fee.

LIC Indicative NTA (continued)

Using the Bell Potter Indicative NTA, we calculate the effective impact on the share price if the premium or discount were to normalise to the 1, 3, 5 and 10 year average. We have also calculated this figure on an annualised basis.

The Indicative NTA is not without error and clearly susceptible to higher turnover, tax realisation, receipt and payment of dividends and accrued performance fees. As such, variations will occur across LICs and different market conditions. We have included the Average Error (average of the monthly NTA less Indicative NTA), Average Absolute Error (average of the monthly NTA less Indicative NTA on an absolute basis), and the range of Minimum and Maximum Errors over the previous 12-month period.

Table 13: Premium/Discount Normalisation and Error Tracking (as at 29 January 2018)

LIC Indicative NTA (continued)

A number of LICs under our coverage currently have options outstanding. Options dilute the NTA when exercised and therefore have an impact on the premium or discount.

Table 14: Dilution Effect of Outstanding Options on Indicative NTA (as at 29 January 2018)

Liquidity

Liquidity is an important characteristic to consider when making an investment. Liquidity is the ability to buy or sell a particular security. Unfortunately, the volume traded among some LICs can be quite thin at times and may be difficult to trade larger lines. Therefore, liquidity needs to be taken into consideration when investing in this asset class. In the table below, we have a look at the 3 year Weekly and Monthly Averages for the LICs in our coverage.

Table 15: Liquidity

Indirect Cost Ratio: Fees and Expenses

In the Graphs below, we have provided the Indirect Cost Ratio (ICR) for LICs in our coverage for the full year ending 30 June 2017. The ICR has been calculated both with and without performance fees. We are using this method of calculation to standardise the cost ratios across our LIC universe given the many different interpretations of the Management Expense Ratio, which is a frequently used expense calculation. ICR is generally accepted as the principal expense ratio calculation for the Managed Funds industry. Note, a number of LICs have been on the market for less than a year, therefore ICR is non-applicable.

Graph 13: Indirect Cost Ratio

* The shareprice benchmark has been compared against the S&P/ASX All Ordinaries Accumulation Index. + The NTA has been compared against the S&P/ASX 200 Accumulation.

*+ Measurement of a LIC's performance is calculated after all operating expenses, provision and payment of both income and realised capital gains tax and the reinvestment of dividends, and do not incorporate franking. Index returns however are entirely before any operating expenses or taxation. LIC returns will consequently be understated relative to the Index return.

ARGO INVESTMENTS (ARG)

Domestic Focussed

Mandate:	Australian listed equities	Benchmark:	S&P/ASX 200 Accumulation
Manager:	Internal	Indirect cost ratio with perf. fee:	0.16%
Listed:	1946	Indirect cost ratio w/out perf. fee:	0.16%

Investment Strategy

ARG's objective is to maximise long-term returns to shareholders through a balance of capital and dividend growth. The Company seeks to invest in quality companies that display sound management and a capability to grow profitability to fund increasing dividend payments. ARG is a value orientated, bottom-up stock picker whose objective is to buy on price weakness and hold for the long-term. ARG characterises itself as moderately benchmark aware, value driven and fundamentally based.

* The share price benchmark has been compared against the S&P/ASX All Ordinaries Accumulation Index. + The NTA has been compared against the S&P/ASX 200 Accumulation.

*+ Measurement of a LIC's performance is calculated after all operating expenses, provision and payment of both income and realised capital gains tax and the reinvestment of dividends, and do not incorporate franking. Index returns however are entirely before any operating expenses or taxation. LIC returns will consequently be understated relative to the Index return.

WAM LEADERS (WLE)

Domestic Focussed

Mandate:	Australian Listed Equities	Benchmark:	S&P/ASX200 Accumulation
Manager:	Wilson Asset Management	Indirect cost ratio with perf. fee:	1.62%
Listed:	May-16	Indirect cost ratio w/out perf. fee:	1.62%

Investment Strategy

WLE is a LIC focussed on investments within the S&P/ASX 200 Index. WLE's investment objective is to deliver investors a rising stream of fully franked dividends, provide capital growth and preserve capital. WLE achieves this by combining two different investment strategies – a Research Driven strategy, which aims to identify micro and macro-economic trends and under research companies, and Market driven strategy, which targets relatively short-term arbitrage and mispricings.

Personnel

Investment Personnel: Geoff Wilson, Chris Stott, Matthew Haupt, Martin Hickson, Oscar Oberg, Tobias Yao, John Ayoub. Directors: Geoff Wilson (Chairman), Chris Stott, Kate Thorley, Melinda Snowden, Lindsay Mann.

Key Information

WHITEFIELD (WHF)

Domestic Focussed

Mandate:	Australian listed equities	Benchmark:	S&P/ASX 200 Ind Accumulation
Manager:	White Funds Management Pty Ltd	Indirect cost ratio with perf. fee:	0.40%
Listed:	1923	Indirect cost ratio w/out perf. fee:	0.40%

Investment Strategy

WHF seeks to own a portfolio of attractively priced businesses with a proven or strengthening ability to deliver shareholder value. Its investment strategy utilises a disciplined quantitative and qualitative process to identify and assess Quality, Intrinsic Value and Mispricing, and will seek to invest where these elements favour their shareholders. It takes a style neutral approach which is designed to provide a diversified return despite their focus on industrials.

QV EQUITIES (QVE)

Domestic Focussed

Mandate:	Australian Listed Equities	Benchmark:	S&P/ASX 300 Ex-20 Accum
Manager:	Investors Mutual	Indirect cost ratio with perf. fee:	1.01%
Listed:	Aug-14	Indirect cost ratio w/out perf. fee:	1.01%

Investment Strategy

QVE's primary objective is to achieve long term value through a combination of capital growth and income. This will be established by holding a diversified portfolio outside the S&P/ASX 20 Index. QVE will hold 20-50 stock predominately from the S&P/ASX 300 –ex Top 20. The Company seeks to invest in quality companies that display four key characteristics; an established competitive advantage, recurring and predictable earnings, strong management, and ability to grow over time. QVE characterises itself as value-driven investor, with a bottom-up research approach.

PERPETUAL EQUITY INVESTMENT CO (PIC)

Domestic Focussed

Mandate:	Aust/Intl Listed Equities	Benchmark:	S&P/ASX 300 Accum
Manager:	Perpetual Investment Mgmt	Indirect cost ratio with perf. fee:	1.32%
Listed:	Dec-14	Indirect cost ratio w/out perf. fee:	1.32%

Investment Strategy

PIC's concentrated portfolio will primarily consist of mid cap Australian companies along with a smaller portion of global listed securities in an attempt to generate outperformance relative to the benchmark. The Manager will undertake a bottom up research approach to identify companies with four key quality characteristics; sound management, conservative debt (typically d/e ratio less than 50%), quality of business, and recurring earnings. The portfolio will traditionally consist between 20-40 securities.

CLIME CAPITAL (CAM)

Domestic Focussed

Mandate:	Australian listed equities	Benchmark:	All Ordinaries Accumulation
Manager:	Clime Asset Management	Indirect cost ratio with perf. fee:	1.92%
Listed:	Apr-04	Indirect cost ratio w/out perf. fee:	1.92%

Investment Strategy

CAM offers investors the opportunity to invest in a value focused closed end Investment Company managed by a top performing Australian Value Equity Manager Clime Asset Management. CAM applies a four tier investment strategy: Acquire securities in attractive companies when the market price on offer trades at a discount to their assessed value; reduce or close positions when the market price is well above the assessment of value; ensure each investment meets a realistic required return to ensure the risk and return of the portfolio is properly balanced to achieve returns without risking capital; seek investments with an enhanced yield; and maintain a high cash position when prices are expensive and value is not readily available in the market.

* The investment performance calculation has been impacted by the initial uplift associated with the 1 for 4 Renounceable Rights issue (CAMPA) issued in April 2007. However, this is offset by the ongoing cost of the issue which has an effective 7.5% fully franked coupon. CAMPA converts into ordinary equity in April 2017.

* Measurement of a LIC's performance is calculated after all operating expenses, provision and payment of both income and realised capital gains tax and the reinvestment of dividends, and do not incorporate franking or options. Index returns however are entirely before any operating expenses or taxation. LIC returns will consequently be understated relative to the Index return.

FLAGSHIP INVESTMENTS (FSI)

Domestic Focused

Mandate:	Australian listed equities	Benchmark:	All Ordinaries Accumulation
Manager:	EC Pohl & Co Pty Ltd	Indirect cost ratio with perf. fee:	1.47%
Listed:	2000	Indirect cost ratio w/out perf. fee:	0.60%

Investment Strategy

FSI provides investors with access to a diversified Australian investment portfolio. It aims to maintain 90% of available funds in equity investments with the balance in cash and equivalent. FSI is best suited to investors with a medium to long-term time horizon. FSI's central investment strategy is to invest in high quality business franchises that have the ability to grow sales and earnings at rates above GDP, producing superior investment returns over the long-term. The company adopts an active investment strategy comprising a broad spectrum of well managed companies.

CBG CAPITAL (CBC)

Domestic Focussed

Mandate:	Australian Listed Equities	Benchmark:	S&P/ASX 200 Accum
Manager:	CBG Asset Mgmt	Indirect cost ratio with perf. fee:	2.19%
Listed:	Dec-14	Indirect cost ratio w/out perf. fee:	2.19%

Investment Strategy

CBC invests in portfolio of listed securities predominately in S&P/ASX200, with an emphasis on ex-S&P/ASX100 securities. The mandate is index unaware and style neutral. The Manager applies a disciplined investment process, using fundamental analysis to assess each securities' drivers, and then followed up by meeting with management. The portfolio will typically consist of 30-60 securities and is expected to take material underweight or overweight sector positions versus the index.

WAM CAPITAL (WAM)

Domestic Focussed

Mandate:	Australian listed equities	Benchmark:	All Ordinaries Accumulation
Manager:	Wilson Asset Management	Indirect cost ratio with perf. fee:	1.18%
Listed:	1999	Indirect cost ratio w/out perf. fee:	1.18%

Investment Strategy

WAM Capital Limited (WAM) provides investors with exposure to a listed investment company with an actively managed diversified portfolio of undervalued growth companies. These are primarily found in the small to mid cap industrial sector. WAM also provides exposure to relative value arbitrage and market mispricing opportunities. The investment objectives are to deliver a growing stream of fully franked dividends, to provide capital growth and to preserve capital. WAM has a two fold investment strategy. Research driven: extensive research, focusing on free cash flow, then rating the company's management, earnings growth potential, valuation, industry position and catalyst for share price growth. Market driven: aims to take advantage of short-term relative arbitrage opportunities and mispricing in the market.

Personnel

Investment Personnel: Geoffrey Wilson, Chris Stott, Martin Hickson, Matt Haupt, John Ayoub, Oscar Oberg and Tobias Yao. Directors: Geoffrey Wilson, Matthew Kidman, James Chirnside, Chris Stott, Kate Thorley and Lindsay Mann.

WAM RESEARCH (WAX)

Domestic Focussed

Mandate:	Australian listed equities	Benchmark:	All Ordinaries Accumulation
Manager:	Wilson Asset Management	Indirect cost ratio with perf. fee:	1.32%
Listed:	2003	Indirect cost ratio w/out perf. fee:	1.32%

Investment Strategy

WAM Research Limited (WAX) is a LIC primarily investing in small to medium industrial companies listed on the ASX. The investment objectives are to provide a growing stream of fully franked dividends and to achieve a high real rate of return, comprising both income and capital growth within risk parameters acceptable to the Directors. WAX has a research driven investment strategy, focussed on identifying free cash flow, then rating the company's management, earnings growth potential, valuation, industry position and catalyst for share price growth.

WESTOZ INVESTMENT COMPANY LIMITED (WIC)

Domestic Focussed

Mandate:	Australian listed equities	Benchmark:	S&P/ASX Small Ords Accum
Manager:	Westoz Funds Management	Indirect cost ratio with perf. fee:	1.89%
Listed:	Sep-09	Indirect cost ratio w/out perf. fee:	1.23%

Investment Strategy

WIC invests in small to medium sized companies, generally with some connection to Western Australia. Its investment objective is to generate consistent positive returns over the medium term, thereby providing a reliable stream of dividends and capital growth for investors. A concentrated portfolio (generally 10 to 20 stocks) is held and given the focus on Western Australia, above average exposure to the resources sector is a feature. If suitable equity investments are not available, large cash positions may be held from time to time.

* The shareprice benchmark has been compared against the S&P/ASX All Ordinaries Accumulation Index. + The NTA has been compared against the S&P/ASX Small Ordinaries Accumulation Index.

*+ Measurement of a LIC's performance is calculated after all operating expenses, provision and payment of both income and realised capital gains tax and the reinvestment of dividends, and do not incorporate franking. Index returns however are entirely before any operating expenses or taxation. LIC returns will consequently be understated relative to the Index return.

OZGROWTH (OZG)

Domestic Focussed

Mandate:	Australian listed	Benchmark:	S&P/ASX Small Ords Accum
Manager:	Westoz Funds Management	Indirect cost ratio with perf. fee:	1.38%
Listed:	Jan-08	Indirect cost ratio w/out perf. fee:	1.38%

Investment Strategy

OZG invests in small to medium sized companies, generally with some connection to Western Australia. The group's investment objective is to generate a consistent positive return over the medium term. OZG will hold a concentrated portfolio of securities and a variable but significant amount of cash. It will also invest in smaller situations (sub \$100m market cap) and consider unlisted opportunities.

NAOS EMERGING OPPORTUNITIES (NCC)

Domestic Focussed

Mandate: Australian listed equities/ Long/Short **Benchmark:** S&P/ASX Small Ords Accum
Manager: NAOS Asset Management **Indirect cost ratio with perf. fee:** 2.57%
Listed: Feb-13 **Indirect cost ratio w/out perf. fee:** 2.05%

Investment Strategy

NCC invests in Emerging Industrials Companies that are outside the S&P/ASX 100 Index. The Portfolio will hold a concentrated number of positions, which on average will be 0-15 positions when fully invested. Many of these Emerging Companies are often overlooked by the Market and therefore potentially inefficiently priced. The Manager will carefully select investment opportunities to create a Portfolio that seeks to exploit market inefficiencies and structure a Portfolio with a disciplined and risk controlled approach.

ACORN CAPITAL INVESTMENT FUND (ACQ)

Domestic Focussed

Mandate:	Australian listed/unlisted equities	Benchmark:	S&P/ASX Small Ords Accum
Manager:	Acorn Capital	Indirect cost ratio with perf. fee:	1.75%
Listed:	May-14	Indirect cost ratio w/out perf. fee:	1.75%

Investment Strategy

ACQ invests in Listed and Unlisted Microcaps. The manager believe that through an in-house research driven investment process, the pricing inefficiencies that exist in both listed and unlisted microcaps can be exploited to earn returns superior to those available in the broader market.

BAILADOR TECHNOLOGY INVESTMENT (BTI)

Domestic Focussed

Mandate:	Aus/NZ Unlisted Internet Comp	Benchmark:	8.0% p.a. Hurdle
Manager:	Bailador Investment Management	Indirect cost ratio with perf. fee:	2.55%
Listed:	Nov-14	Indirect cost ratio w/out perf. fee:	2.55%

Investment Strategy

Offers investors a portfolio of unlisted internet related businesses founded in Aus and NZ. BTI focuses on private companies that are in the 'expansion stage' of their business cycle, with a demonstrated revenue lead and customer base as well as an enterprise value of between \$10m and \$200m. The Manager will seek to invest in companies that are looking for capital to grow the existing business, with no long term debt obligations. The Manager will also focus on companies that apply a subscription based or marketplace revenue model.

CADENCE CAPITAL (CDM)

Domestic Focussed

Mandate:	Aus / Intl listed equities, Long/Short	Benchmark:	All Ordinaries Accumulation
Manager:	Cadence Asset Management	Indirect cost ratio with perf. fee:	2.01%
Listed:	Dec-06	Indirect cost ratio w/out perf. fee:	1.23%

Investment Strategy

CDM is a long-short Australian equities fund, with a long bias, that invests predominantly in equities listed on the ASX. More recently, the manager has taken advantage of opportunities in the international markets. The manager uses both fundamental and technical analysis in making investing decisions, employing bottom up research and a disciplined 'Entry and Exit' strategy. Both strategies seek to exploit the inefficient flow of information through the market, individual equity momentum and the cyclical nature of markets.

Exposure (Net)

*+ In May 2011 CDM received \$0.22 per CDM share of franking credits when RHG returned the majority of its assets in the form of a fully franked dividend. At the time CDM shares were trading at \$125. These franking credits were worth 17.6% of the CDM share price at the time and are not reflected in our performance calculations as the calculations are based on pre-tax NTA and not post-tax NTA. * The share price benchmark and NTA have been compared against the S&P/ASX All Ordinaries Accumulation Index.

*+ Measurement of a LIC's performance is calculated after all operating expenses, provision and payment of both income and realised capital gains tax and the reinvestment of dividends, and do not incorporate franking or options. Index returns however are entirely before any operating expenses or taxation. LIC returns will consequently be understated relative to the Index return.

AUSTRALIAN LEADERS FUND (ALF)

Domestic Focussed

Mandate:	Australian listed equities, Long/Short	Benchmark:	All Ordinaries Accumulation
Manager:	Watermark Funds Management	Indirect cost ratio with perf. fee:	1.25%
Listed:	Feb-04	Indirect cost ratio w/out perf. fee:	1.25%

Investment Strategy

ALF looks to invest in leading Australian companies, with strong business fundamentals on attractive terms. The group has a long/short mandate that allows the company to take advantage of both undervalued and overvalued securities. The proceeds raised from short selling securities provides an additional source of funding for the group. These funds are either retained in cash or re-invested into the investment portfolio of shares we expect to outperform.

Personnel

Investment Personnel: Justin Braithling (CIO), Tom Richardson (PM), Simon Felton (PM), Hamish Chalmers (Analyst), Delian Entchev (Analyst), Nick Cameron (Analyst), Ian Carmichael (Analyst). Directors: Justin Braithling (Chairman), Julian Gosse, John Abernethy and Geoff Wilson.

WAM ACTIVE (WAA)

Domestic Focussed

Mandate:	Australian listed equities, Long/Short	Benchmark:	All Ordinaries Accumulation
Manager:	Wilson Asset Management	Indirect cost ratio with perf. fee:	3.89%
Listed:	2008	Indirect cost ratio w/out perf. fee:	2.10%

Investment Strategy

WAM Active Ltd (WAA) offers investors exposure to an active trading style with the aim of achieving a sound return with a low correlation to traditional markets. The investment objectives are to deliver investors a growing income stream in the form of fully franked dividends and to preserve capital in both the short term and long term. WAA uses a market driven approach to investing - it aims to take advantage of short-term relative arbitrage and mispricing in the market. The manager participates in IPOs, rights issues, placements, schemes of arrangement and looks for arbitrage opportunities and discount to asset plays, along with other market events viewed as favourably priced.

Personnel

Investment Personnel: Geoffrey Wilson, Chris Stott, Martin Hickson, Matt Haupt, John Ayoub, Oscar Oberg and Tobias Yao. Directors: Geoffrey Wilson, Matthew Kidman, Chris Stott, Kate Thorley and John Abernethy.

Key Information

Exposure: International/Domestic, Equities/Fixed Income/Derivatives, Cash

Style: Large/Medium/Small Cap, Balanced/Value/Growth, Passive/Active, Long/Short

Derivatives: Used for arbitrage and in anticipation of a decline in the market value of that security.

Cash (Fixed Income)/Debt: Cash \$5.8m (31 Dec '17)

Dividend reinvestment plan: Yes, 2.5% discount to 4 day VWAP from (and including) ex-date

Other: Affiliated with WAM Research (ASX code: WAX) and WAM Capital (ASX code: WAM).

ABSOLUTE EQUITY PERFORMANCE FUND (AEG)

Domestic Focussed

Mandate:	Market Neutral	Benchmark:	RBA Cash Rate
Manager:	Bennelong Long Short Equity Mgmt	Indirect cost ratio with perf. fee:	3.08%
Listed:	Jun-15	Indirect cost ratio w/out perf. fee:	1.98%

Investment Strategy

AEG focusses on minimising market risk, sector risk and exogenous risk by creating a market neutral fund through a portfolio of pair trades within primarily the ASX 100. A Pair Trade involves short selling a security and using the proceeds to purchase a security in a similar industry with an equal dollar value. This produces a portfolio of low volatility and largely exposed to company specific risk, a risk The Manager believes has a greater ability to control.

WATERMARK MARKET NEUTRAL FUND (WMK)

Domestic Focussed

Mandate:	Australian listed equities	Benchmark:	RBA Cash Rate
Manager:	Watermark Funds Management	Indirect cost ratio with perf. fee:	1.74%
Listed:	Jul-13	Indirect cost ratio w/out perf. fee:	1.56%

Investment Strategy

WMK identifies "strong" companies to invest in, or 'long', and "weaker" companies to sell, or 'short', without being fully exposed to the volatility and risks of the broader share market. The Manager looks to profit from the mispricing of shares by taking advantage of the natural hedge between long and short positions. The longs and shorts are approximately of equal value, while investors' capital is retained in cash earning interest. The performance of WMK will be the interest on the cash at bank plus the difference in the performance of the Long and Short portfolios.

DJERRIWARRH INVESTMENTS (DJW)

Domestic Focussed

Mandate: Australian listed equities	Benchmark: S&P/ASX 200 Accumulation
Manager: Internal	Indirect cost ratio with perf. fee: 0.46%
Listed: 1995	Indirect cost ratio w/out perf. fee: 0.46%

Investment Strategy

DJW invests in Australian equities with a focus on stocks where there is an active options market and/or sustainable dividend yield. The company aims to provide shareholders with attractive investment returns through an enhanced level of dividends and attractive total returns over the medium to long term. It takes a medium to longer term view of value which means that the aim is to buy and hold individual stocks for the long term based on selection criteria which, in summary, include: formulation and execution of the business strategy and its underlying business value; and key financial indicators, including prospective price earnings relative to projected growth, sustainability of earnings and dividend yield (including franking) and balance sheet position including gearing, interest cover and cash flow.

Personnel

Investment personnel: Mark Freeman (CEO). Directors: John Paterson (Chairman), Andrew Guy, Alice Williams, Graham Goldsmith, Kathryn Fagg, Karen Wood, and Robert Edgar.

Key Information

Exposure: International/Domestic, Equities/Fixed Income/Derivatives, Cash

PLATO INCOME MAXIMISER (PL8)

Domestic Focussed

Mandate:	Australian Listed Equities	Benchmark:	S&P/ASX 200 FC Adj Daily TR
Manager:	Plato Investment Mgmt	Indirect cost ratio with perf. fee:	n/a
Listed:	May-17	Indirect cost ratio w/out perf. fee:	n/a

Investment Strategy

PL8 aims to deliver income (inc. franking) and total returns in excess of the S&P/ASX200 Franking Credit Adjusted Daily Total Return Index. The Manager achieves this by 3 means; dividend run-up effect, franking credits and running a dividend trap model. The final portfolio is expected to display a portfolio composition similar to the underlying benchmark. The Company aims to pay regular monthly dividends once it has sufficient profit reserves.

MFF CAPITAL INVESTMENTS (MFF)

International Focussed

Mandate:	International Equities (US focus)	Benchmark:	MSCI World Index (AUD)
Manager:	Magellan Asset Management	Indirect cost ratio with perf. fee:	0.91%
Listed:	2006	Indirect cost ratio w/out perf. fee:	0.72%

Investment Strategy

The primary focus of the portfolio is to invest in large listed international companies assessed to have attractive business characteristics at a discount to their assessed intrinsic values. The Directors believe that this will generate superior risk adjusted returns over the medium to long term, while minimising the risk of permanent capital loss.

PLATINUM CAPITAL (PMC)

International Focussed

Mandate:	Absolute Return	Benchmark:	MSCI All Country World Net Index
Manager:	Platinum Asset Management	Indirect cost ratio with perf. fee:	1.42%
Listed:	1994	Indirect cost ratio w/out perf. fee:	1.42%

Investment Strategy

PMC utilises a bottom-up, stock selection methodology and is focused on absolute returns over returns relative to any index. Investments may be in global equities (including Australia), perceived by the Manager as being inappropriately valued by the market. This is combined with screening software that allows the Company to select stocks for further evaluation based on a specific criteria. The Criteria is determined by the Manager's hypothesis regarding social, political or economic change. These factors are intended to bring together a portfolio of stocks with a below average risk.

* The shareprice benchmark has been compared against the MSCI All Country World Net Index. + The NTA has been compared against the MSCI All Country World Net Index.

*+ Measurement of a LIC's performance is calculated after all operating expenses, provision and payment of both income and realised capital gains tax and the reinvestment of dividends, and do not incorporate franking. Index returns however are entirely before any operating expenses or taxation. LIC returns will consequently be understated relative to the Index return.

ANTIPODES GLOBAL INVESTMENT COMPANY (APL)

International Focussed

Mandate:	Absolute Return	Benchmark:	MSCI All Country World Net Index
Manager:	Antipodes Partners	Indirect cost ratio with perf. fee:	n/a
Listed:	Oct-16	Indirect cost ratio w/out perf. fee:	n/a

Investment Strategy

APL is a global asset manager offering a pragmatic value approach. The objective of the strategy is to generate absolute returns in excess of the benchmark, at below market levels of risk. APL seeks to take advantage of the market's tendency for irrational extrapolation, identify investments that offer a high margin of safety and build portfolios with a capital preservation focus. APL deploys multiple levers - longs, shorts and currency management - to manage risk and drive returns. Typical net equity exposure is in the 50-100% range

PENGANA INTERNATIONAL EQUITIES (PIA)

International Focussed

Mandate:	International Equities	Benchmark:	MSCI World Return Net Div Reinvested AUD
Manager:	Pengana Capital Group	Indirect cost ratio with perf. fee:	1.98%
Listed:	2004	Indirect cost ratio w/out perf. fee:	1.98%

Investment Strategy

PIA focuses on investing in a well-constructed portfolio of growing businesses at reasonable valuations. It employs a benchmark unaware strategy with unrestricted access to all international share markets. An integral element of the portfolio construction process is the division of stock into three segments: Core, Cyclical and Opportunistic. Core stocks will represent 60-80% of the LIC while Cyclical or Opportunistic provide opportunity for material upside. PIA will still apply its current ethical screen to its portfolio.

PM CAPITAL GLOBAL OPPORTUNITIES (PGF)

International Focussed

Mandate:	International Equities	Benchmark:	MSCI World Index (AUD)
Manager:	PM Capital	Indirect cost ratio with perf. fee:	1.49%
Listed:	Dec-13	Indirect cost ratio w/out perf. fee:	1.12%

Investment Strategy

PGF offers investors with a diversified portfolio of around 40 listed global (including Australia) equities, with an objective to provide long term capital growth to investors. The Manager utilises a fundamental bottom-up, research intensive investment process, investing in a portfolio of global companies which the Manager views as undervalued. Also note, PGF invests on a long term basis with at least 7 year time horizon.

Personnel

ELLERSTON GLOBAL INVESTMENTS (EGI)

International Focussed

Mandate:	International Equities	Benchmark:	MSCI World Index (Local)
Manager:	Ellerston Capital	Indirect cost ratio with perf. fee:	1.41%
Listed:	Oct-14	Indirect cost ratio w/out perf. fee:	1.41%

Investment Strategy

EGI offers investors exposure to a diversified portfolio of international equities using the Manager's high conviction, contrarian and benchmark independent investment approach. The Manager undertakes a disciplined 'bottom up' stock selection based on fundamental analysis. This is overlaid with the Manager's 'top down' assessment of macroeconomic conditions and the market outlook. The investment portfolio will be relatively concentrated with a target of 10-40 securities.

WATERMARK GLOBAL LEADERS FUND (WGF)

International Focussed

Mandate:	Global listed equities, Long/Short	Benchmark:	RBA Cash Rate
Manager:	Watermark Funds Management	Indirect cost ratio with perf. fee:	n/a
Listed:	Dec-16	Indirect cost ratio w/out perf. fee:	n/a

Investment Strategy

WGF offers investors an alternative to traditional 'long only' global LICs by running a market neutral strategy. This investment approach provides a long/short mandate that allows the company to take advantage of both undervalued and overvalued global securities. The proceeds raised from short selling securities provides funding for WGF to retain as cash or reinvested into the Long portfolio. Typically, the Manager will hold between 40-80 securities within both the Long and Short portfolios.

Personnel

Investment Personnel: Justin Braitting (Chief Investment Officer), Tom Richardson (Portfolio Manager), Simon Felton (PM), Hamish Chalmers (Analyst), Delian Entchev (Analyst), Nick Cameron (Analyst).

GLOBAL VALUE FUND (GVF)

International Focussed

Mandate:	Intl (Multi Assets)	Benchmark:	BBSW 1Year Rate + 4%
Manager:	Mirabella Financial Services^	Indirect cost ratio with perf. fee:	3.55%
Listed:	Jul-14	Indirect cost ratio w/out perf. fee:	2.16%

Investment Strategy

GVF invests globally using a discount capture strategy. The fund owns a range of global assets all purchased at a discount to their intrinsic value. By capturing these discounts for its investors, the manager aims to provide an alternative source of market outperformance compared to more common stock selection strategies. The manager is based in London and has considerable experience in finding international assets trading at a discount to their intrinsic worth, and in identifying or creating catalysts that will be used to unlock this value.

* The shareprice bench mark has been compared against the MSCI World price index in AUD. + The NTA has been compared against the BBSW 1Year rate + 4 % ^The Manager has seconded the investment team at Staude Capital to manage the GVF.

*+ Measurement of a LIC's performance is calculated after all operating expenses, provision and payment of both income and realised capital gains tax and the reinvestment of dividends, and do not incorporate franking. Index returns however are entirely before any operating expenses or taxation. LIC returns will consequently be understated relative to the Index return.

ARGO GLOBAL LISTED INFRASTRUCTURE (ALI)

International Focussed

Mandate:	Global Listed Infrastructure	Benchmark:	FTSE Infra 50/50 (90%); BofA Fixed Rate (10%)
Manager:	Argo Service Company	Indirect cost ratio with perf. fee:	1.51%
Listed:	Jul-15	Indirect cost ratio w/out perf. fee:	1.51%

Investment Strategy

ALI invests in listed global infrastructure. Its investment strategy involves a top down approach of their Global Investment universe – followed by a bottom up analysis of individual securities. The portfolio is concentrated across 50 – 100 stocks with a significant weighting to US Infrastructure securities. The Manager believes this strategy offers a value add to investors as global infrastructure is an asset class that has historically been characterised by stable income, strong returns, low volatility and low correlation to broader equity and fixed income markets.

Personnel

Investment Personnel: Rob Becker (PM), Ben Morton (PM), Grace Ding, Humberto Medina, Thuy Quynh Dang, Tyler Rosenlicht, Kathleen Morris, Saagar Parikh. Directors: Ian Martin AM (Chairman), Joycelyn Morton, Gary Simon, Andrea Slattery and Jason Beddow.

Key Information

Exposure: **International/Domestic, Equities/Fixed Income/Derivatives, Cash**

Style: **Large/Medium/Small Cap, Balanced/Value/Growth, Passive/Active, Long/Short**

Derivatives: Can hedge against extreme currency movements and enhance income.

Cash/Debt: \$4.8m cash (31 Dec '17), \$0m Debt (30 Jun '17)

Dividend reinvestment plan: Yes

Other: Portfolio managed by Cohen & Steers, a leading global manager specialising in listed infrastructure.

PM CAPITAL ASIAN OPPORTUNITIES FUND (PAF)

International Focussed

Mandate: Asian (Ex- Jpn) Equities

Manager: PM Capital

Listed: May-14

Benchmark: MSCI Asia (Ex-Jpn) Accumulation

Indirect cost ratio with perf. fee: 1.48%

Indirect cost ratio w/out perf. fee: 1.48%

Investment Strategy

PAF offers investors with a diversified portfolio of around 15-35 Asian listed equities (ex-Japan), of which the Manager considers to be undervalued. With a wide investment universe, the Manager focuses on key themes (like the gaming industry or the communications industry) that the Manager believes will provide long term growth in Asia. The Manager's investment process is a research intensive, bottom up approach which identifies both risk and opportunity.

Personnel

Fixed Rate Debt

Security view

CAMG is a redeemable convertible note, paying interest at a 6.25% fixed rate yield out until its 30 Nov 2021 maturity date. In addition, each CAMG security contains an unlisted option to convert into CAM shares at any time at a price of \$0.96, compared with the current CAM price of \$0.905. This requires an annualised CAM share price gain of at least 1.6% for the option to be in the money by the maturity date. We currently value this option at \$0.02. The \$21.4m CAMG issue is CAM's only debt facility, representing a pro forma gearing ratio (interest bearing liabilities / total equity) of 26.8% at 31 December 2017. The key risk investing in CAMG is the impact from a decline in the market value and earnings of CAM's investment portfolio. This may reduce the ability of CAM to pay scheduled interest and redeem CAMG at maturity, especially if this is associated with a material increase in gearing.

Redemption details

Unless redeemed or converted earlier, CAMG will be redeemed for \$0.96 on the 30 Nov 2020 Maturity Date. In addition, holders have a conversion option into CAM shares on a one for one basis at \$0.96 at any time before the Maturity Date.

Parent view

Listing in April 2004, CAM's investment approach seeks to deliver strong risk adjusted total returns over the long term. Its investment focus targets undervalued companies, where via the macroeconomic overlay, it seeks to enhance returns and manage risk. At 31 December 2017, its \$106.7m investment portfolio was allocation was 77.5% Australian equities, 13.1% cash, 8.0% international equities, and 1.4% USD cash.

Fixed Rate Debt

Security view

NSCG (formerly Contango) is a redeemable convertible note, paying interest at a 5.50% fixed rate yield out until its 31 Mar 2020 maturity date. In addition, each NSCG security contains an unlisted option to convert into NSC shares on any half yearly interest payment date at a price of \$1.30, compared with the current NSC price of \$0.92. This currently requires an annualised NSC share price gain of at least 15.8% for the option to be in the money by the maturity date. We currently value this option at \$0.10. The \$26.5m NSCG issue is NSC's only debt facility, representing a gearing ratio (interest bearing liabilities / total equity) of 16% at 30 June 2017 (covenant 25%). The key risk investing in NSCG is the impact from a decline in the market value and earnings of NSC's investment portfolio. This may reduce the ability of NSC to pay scheduled interest and redeem NSCG at maturity, especially if this is associated with a material increase in gearing.

Redemption details

Unless redeemed or converted earlier, NSCG will be redeemed for \$100 on 31 March 2020. In addition, holders have a conversion option into NSC shares at \$1.30 at each half yearly interest payment date.

Parent view

Listing in 2004, NSC is the largest small cap LIC with an investment portfolio of \$198m at June 2017. Its portfolio is currently diversified across 93 securities where the largest exposure to a single company represents 3.7% of the total portfolio. Its objective is to invest into small and microcap companies typically worth \$10-350m at the time of investment, seeking to outperform its benchmark of the medium to long term, while providing for the payment of regular franked dividends. The Manager uses the 'business cycle' approach to identify themes that will be important drivers of performance for particular sectors and industries.

Fixed Rate Reset Preference Share

Security view

In a low interest rate environment, the 7.00% fully franked coupon fixed until Nov 2018 appears compelling. The investment metrics remain attractive at \$105.00 with a gross running yield of 9.52% and a gross yield to first call of 4.93%. The operational risk of WHF is low with its conservative investment portfolio typically exposed to the top 100 ASX listed industrial companies, ~30% of which is weighted to the 4 major banks. With no debt, the \$40m WHFPB issue represents 8.9% of WHF's \$449m listed portfolio at 30 Sep 2017. This places WHF in a very strong position to pay preference dividends and fund conversion / redemption.

Conversion details

At the first reset date (30 Nov 2018), if WHF wishes to amend WHFPB terms, it needs to provide holders with details of the new terms at least 50 business days prior to the reset date. WHF may also elect to convert or redeem WHFPB at the reset date. The reset date also provides WHFPB holders the option to elect for Holder Exchange, where WHF has the option to convert WHFPB into shares, or redeem for cash. All future reset dates post 2018 will occur at 3 year intervals. Non payment of scheduled WHFPB dividends provides investors with the right to request Holder Exchange. Investors may also request Holder Exchange under a Holder Trigger Event if WHF's gearing (net debt + prefs / equity) exceeds 35%. WHF also has a conversion right under a Gearing Event if gearing exceeds 25%.

Parent view

With a history dating back to 1923, WHF is one of Australia's oldest listed investment companies. WHF's investment portfolio at 30 Sep 2017 comprised \$13m cash and \$449m of ASX listed securities across 167 industrial companies.

Security price and running yield

Fixed distributions

Appendix A: Glossary of terms

Annualised Compound Total Returns: The Annualised Compound Total Return calculates the constant yearly return that would result in the initial value of an investment reaching its present value.

Active Management: Investing with the goal of outperforming a benchmark index.

Balanced Investing: Investing in securities with neither a preference for Growth or Value investing.

Beta: In the context of this report, a Beta is a representation of the tendency of a company's share price to respond to swings in the Market. A Beta of 1 indicates that a company's share price will move in line with the Market. A Beta of greater than 1 indicates that a share's price will be more volatile than the Market. Our Market Proxy is the All Ordinaries Accumulation Index.

Dilutive Security: When a company issues additional shares in itself at a price below the current value of existing shares this will have a dilutive effect.

Estimated Fully Diluted NTA: Some LICs have additional securities that have the ability to convert to, or create, new ordinary securities in the Company. If a security can be converted to ordinary securities at a price lower than the LIC's NTA, this will dilute its NTA on a per share basis.

Excess Return to Risk Ratio: This ratio, also known as the Sharpe Ratio (see Sharpe Ratio for definition), provides a measure of the return of each portfolio relative to the risk taken by the Investment Manager in achieving that return. A high return is only desirable if it does not come with too much additional risk (volatility of returns - see Standard Deviation).

Grossed Up Dividend Yield: Dividends paid plus any franking credits passed on to shareholders. We have focused on this measure to enable valid comparison between LICs whose dividends are franked and those that are not.

Growth Investing: Investing in securities with a bias towards higher projected Earnings Per Share growth rates and Return On Equity.

Indirect Cost Ratio: The ICR, as defined in the Corporations Act 2001, is the ratio of the Fund's management costs to average net assets. In layman's terms, it covers all expenditure, excluding transaction and finance costs, in the management of the Fund. This includes management fees, performance fees, marketing, audit, legal, rent, etc.

We are using this method of calculation to standardise the cost ratios across our LIC universe, given many different interpretations of the MER calculations by LICs and the inability to confirm the calculation. ICR is generally accepted as the principal expense ratio calculation for the Managed Funds industry.

Net Tangible Assets (NTA): Total assets of the Company minus any intangible assets such as goodwill and trademarks, less all liabilities of the Company. This is calculated before any theoretical tax is payable if the entire portfolio was sold. The largest liability of most LICs is the Management Fee, while some LICs also provide for performance fees, should the LIC's portfolio achieve certain benchmarks. Management fees are generally a reflection of how actively a portfolio is managed as well as its size.

Option Adjusted Portfolio Return: A LIC's calculated portfolio return over a period may be negatively impacted if there are new securities issued during a period. This is because the Manager will not have been able to generate returns off the new funds over the entire period, which will detract from the performance of the overall portfolio. Accordingly, where new securities have been issued in a LIC we will remove the impact of those securities creating an Option Adjusted Portfolio Return.

Passive Management: Investing in an attempt to track the return of the underlying benchmark index. Typically a passively managed portfolio has good diversification, low turnover (good for keeping down internal transaction costs), and lower management fees.

Premium/Discount to Pre-Tax NTA: While share prices of LICs are generally based around their NTA, the vagaries of supply and demand, as well as the market perception of a company's outlook, mean that a LIC's share price may move substantially below (discount) or above (premium) its NTA.

Appendix A: Glossary of terms (continued)

Renounceable Rights Issue: This is an offer by the LIC to shareholders to purchase more shares in the Company. Given these rights are normally issued at a discount they have an inherent value that can be traded on the ASX.

Stapled Options: These are options that cannot be traded individually. They are attached to a share or similar security and this combined security must be traded in a 'bundle'.

Total Shareholder Return (TSR): Highlights total increase in the value of \$100 invested in a LIC over a given period by a shareholder on the assumption that dividends are reinvested. TSR takes into account grossed up dividends paid as well as share price appreciation and may differ from share price performance in this regard.

Value Investing: Investing in securities that appear to be undervalued taking in to consideration certain valuation metrics.

Appendix B: Legend to Performance Measures

The following provides an explanation of each item contained within 'our performance measures'.

Figure - Historical Performance of Pre-Tax NTA and Security Price versus the Benchmark

Performance	3-mth	6-mth	1 year	3 yr p.a.	5 yr p.a.	10 yr p.a.
Share price*						
Performance	3.9%	-6.0%	-14.7%	5.4%	-0.6%	6.9%
Index	1.9%	-9.6%	-11.4%	8.5%	-2.1%	6.3%
Active return	2.0%	3.6%	-3.3%	-3.1%	1.5%	0.6%
NTA+						
Performance	3.4%	-7.8%	-7.8%	9.0%	0.1%	7.4%
Benchmark	2.1%	-9.7%	-10.5%	7.6%	-2.3%	6.2%
Active return	1.3%	1.9%	2.7%	1.4%	2.4%	1.2%

Performance - The Annualised Compound Total Return calculates the compound yearly return over a period, inclusive of dividends. Dividends are reinvested from the payment date using the most recent historical pre-tax NTA for the NTA performance calculation and the closing price of

the security on the prepayment date for the security calculation. Where a LIC has been listed for less than three years each return has been adjusted to reflect the annualised return since its listing.

Benchmark - The relevant benchmark has been selected by the Manager. In some instances, the exact Index as selected by a LIC will not be readily available. In such cases, we have determined the most appropriate surrogate index to provide readers with a reasonable guide as to the performance and volatility of that LIC's benchmark. The benchmark is either sourced from IRESS or Bloomberg.

Active-return - Active Return is the difference between the pre-tax NTA or security price and the underlying benchmark. A positive difference indicates an outperformance versus the benchmark and a negative difference indicates an underperformance relative to the benchmark.

Figure - Return and Premium/Discount to pre-tax NTA

Share Price - The light grey line highlights the total increase in the value of \$100 invested by that Investment Manager over the time period (assumes dividends reinvested) on a pre-tax basis. Portfolio performance is measured in dollars on the left-hand axis of the Graph.

Pre-Tax NTA - The black line provides a total increase in the value of \$100 if the investor were able to liquidate the investment at the underlying Pre-Tax NTA over the time period (assumes dividends reinvested). Performance is also referenced to the left-hand axis of the Graph.

Premium/Discount to Pre-Tax NTA - The light green columns represent the share price premium/discount relative to month-end pre-tax NTA and is measured as a percentage on the right-hand axis.

Appendix B: Legend to Performance Measures (continued)

Figure 3 - Risk Return Indicators

Risk/Return Indicators

	Information	Sharpe	Standard	Tracking
Share price*	Ratio	Ratio	Deviation	Error
Year 1	0.18	-0.02	16.4%	15.0%
Year 3	-0.40	-0.62	33.2%	30.2%
Year 5	0.16	-0.18	32.1%	30.5%
NTA+				
Year 1	2.21	0.99	11.4%	3.1%
Year 3	-0.60	-0.56	29.2%	7.2%
Year 5	-0.65	-0.33	25.8%	10.1%

Information Ratio - This Ratio is a measure of the risk adjusted return of the LIC. It is defined as the Active Return divided by the Tracking Error. Active Return is the difference between the return of the security and the return of a selected benchmark index. The Tracking Error is the standard deviation of the Active Return.

Sharpe Ratio - This Ratio provides a measure of the return of each LIC's portfolio relative to the risk taken by the Investment Manager in achieving that return. A high return is only desirable if it does not come with too much additional risk (volatility of returns - see Standard Deviation). A Sharpe Ratio is calculated by subtracting a selected *Risk Free Rate (Aust. Govt 10-year Bond yield)* from a return, and dividing that by the Standard Deviation of that return.

Standard Deviation: This is a measure of the dispersion of a portfolio's returns around its average return. A data set that has many monthly returns a long way from the average return will have a greater standard deviation than a set of monthly returns that are close to the average. In the context of this report, we calculate the average monthly return of each LIC, as represented by changes in its NTA, and from this we can calculate a standard deviation from its average. Theoretically, a LIC that achieves the exact same return every month would have a standard deviation of zero.

Tracking Error: This measures how much the return of a portfolio deviates from the return of its benchmark index. A data set that has a low Tracking Error means that its returns are closely tracking the Portfolio's benchmark. Tracking Error is the standard deviation of the differences between the return of the portfolio and the return of the benchmark.

Appendix C: Disclosures

- WAM Research (WAX): WAX announced an Equity Raising on 28 October 2013. WAM paid a service fee equal to 1.0% (excluding GST) of the Application Monies provided. Bell Potter Securities and its Advisers shared in this Fee.
- Australian Leaders Fund (ALF): ALF announced an Equity Raising on 24 October 2013. ALF paid a service fee equal to 1.25% (excluding GST) of the Application Monies provided. Bell Potter Securities and its Advisers shared in this Fee.
- WAM Capital (WAM): WAM announced an Equity Raising on 14 October 2013. WAM paid a stamping fee equal to 1.0% (excluding GST) of the Application Monies provided. Bell Potter Securities and its Advisers shared in this Fee.
- Watermark Market Neutral Fund (WMK): WMK listed on 18 July 2013. WMK paid a stamping fee equal to 1.0% (excluding GST) of the Application Monies provided with valid Application Forms bearing a Licensee's stamp to the extent Shares were allotted. Bell Potter Securities and its Advisers shared in this Fee.
- Clime Capital (CAM): CAM announced a Renounceable Right Issue on 13 February 2013. CAM paid a stamping fee equal to 1.0% (excluding GST) of the Application Monies provided with valid Application Forms bearing a Licensee's stamp to the extent Shares were allotted. Bell Potter Securities and its Advisers shared in this Fee.
- Cadence Capital (CDM): CDM announced an Equity Raising on 14 January 2013. CDM paid a stamping fee equal to 2.0% (excluding GST) of the Application Monies provided with valid Application Forms bearing a Licensee's stamp to the extent Shares were allotted. Bell Potter Securities and its Advisers shared in this Fee.
- Australian Leaders Fund (ALF): ALF announced an Equity Raising on 19 December 2012. ALF paid a stamping fee equal to 1.0% (excluding GST) of the Application Monies provided with valid Application Forms bearing a Licensee's stamp to the extent Shares were allotted. Bell Potter Securities and its Advisers shared in this Fee.
- Cadence Capital (CDM): CDM announced an Equity Raising on 20 September 2012. CDM paid a stamping fee equal to 2.0% (excluding GST) of the Application Monies provided with valid Application Forms bearing a Licensee's stamp to the extent Shares were allotted. Bell Potter Securities and its Advisers shared in this Fee.
- WAM Capital (WAM): WAM announced an Equity Raising on 23 July 2012. WAM paid a stamping fee equal to 1.0% (excluding GST) of the Application Monies provided with valid Application Forms bearing a Licensee's stamp to the extent Shares were allotted. Bell Potter Securities and its Advisers shared in this Fee.
- PM Capital Global Opportunities Fund (PGF): Bell Potter Securities was a Joint Lead Manager of the PM Capital Global Opportunities Fund IPO on 12 December 2013. PGF paid a service fee equal to 1.25% (excluding GST) of the Application Monies provided with valid Application Forms bearing a Licensee's stamp to the extent Shares were allotted. Bell Potter Securities and its Advisers shared in this Fee.
- Platinum Capital (PMC): Bell Potter Securities was a Co-Manager of the Platinum Capital Placement in November 2013 and received a fee for the service.
- Watermark Market Neutral Fund (WMK): WMK announced a Placement on 24 March 2014. WMK paid a stamping fee equal to 1.0% (excluding GST) of the Application Monies provided with valid Application Forms bearing a Licensee's stamp to the extent Shares were allotted. Bell Potter Securities and its Advisers shared in this Fee.
- Clime Capital (CAM): CAM announced a Placement on 20 March 2014. CAM paid a service fee equal to 1.5% (excluding GST) of the Application Monies provided with valid Application Forms bearing a Licensee's stamp to the extent Shares were allotted. Bell Potter Securities and its Advisers shared in this Fee.
- Future Generation Investment Fund (FGX): FGX paid a service fee equal to 1.82% (excluding GST) of the Application Monies provided with valid Application Forms bearing a Licensee's stamp to the extent Shares were allotted. Bell Potter Securities and its Advisers shared in this Fee.
- PM Capital Asia (PAF): PAF paid a service fee equal to 1.50% (excluding GST) of the Application Monies provided with valid Application Forms bearing a Licensee's stamp to the extent Shares were allotted. Bell Potter Securities and its Advisers shared in this Fee.
- Acorn Capital Investment Fund (ACQ): Bell Potter Securities was a Joint Lead Manager of the Acorn Capital Investment Fund IPO on 1 May 2014, but did not receive a Corporate Fee for this Service. ACQ paid a service fee equal to 1.5% (excluding GST) of the Application Monies provided with valid Application Forms bearing a Licensee's stamp to the extent Shares were allotted. Bell Potter Securities and its Advisers shared in this Fee.
- Global Value Fund (GVF): GVF paid a service fee equal to 2.50% (excluding GST) of the Application Monies provided with valid Application Forms bearing a Licensee's stamp to the extent Shares were allotted. Bell Potter Securities and its Advisers shared in this Fee.
- Magellan Flagship Fund (MFF): Bell Potter Securities was a Co-Manager of the MFF Renounceable Rights issue in May 2015 and received a fee for the service.
- Argo Global Listed Infrastructure (ALI): Bell Potter Securities was a Co-Lead Manager for this IPO in July 2015 and received a fee for the service.
- Wealth Defenders Equity (WDE): Bell Potter Securities was a Co-Lead Manager for this IPO in October 2015 and received a fee for the service.
